HOW WE UPHOLD QUALITY

Before production

a) Order execution and Quality Control
Orders are closely monitored from sampling to the delivery to our factory.

Status on sampling, production and shipment are transmitted to buyers regularly. We maintain a pro-active approach towards identification of problem areas and corrective measures are taken immediately to ensure timely deliveries. Our quality monitoring system pertaining to production has two stages as explained below:

1) Pre-Production Check (PPC)
Risks are reduced by checking material components, accessories / user manuals etc. at this stage itself.

2) Initial Production Check (IPC)
First finished products are checked against buyer's specification and prototype sample. Deviations are identified and brought out for correction.

After production

Inspection during production is carried out to check and verify that the initial discrepancies have been rectified and to ensure the average quality standard of production runs.

1) Final Random Inspection (FIR)
Final random inspection is carried out when the total consignment is packed and ready for delivery. FRI is performed according to the Inspection Standards. The detailed physical inspection of the samples selected at random is based

on specifications of the buyers and it covers the criteria such as design / style, shrinkage, accessories, appearance, markings, color, labeling, material, assortments, workmanship, measurements, packing etc.

2) Quality Management Systems
Our entire production process is certified by Rwanda Bureau of Standards. So you may rest assured that we will always thrive to achieve high standards of quality.

JANIYA INVESTMENTS LTD offers a full collection of apparel that is classy, upscale, and versatile. Our product line includes casual and active wear, office wear for both men and women, uniforms (schools and companies), sportswear, school bags, bedsheets and blankets.
